COMPLETE THE PYRAMID:

- 1. Think about your long-term goals** - what do you hope to see as your end result for this endeavor? Place that at the top of the pyramid. The template places this as a 1 Year goal, but the exact timeline can be adjusted.
 - 2. Next, consider the steps you will need to take to get there** – place smaller steps in the lower levels of the pyramid, working your way backward.
- Ideally, at the very bottom of the pyramid should be an immediate, attainable goal that you can get to work on right away.
 - This can also be done with a calendar; put your big goal on your target date, and then work backwards by week to catalogue what you need to get done in order to make that bigger goal happen.
